

HIMANSHU KUMAR TRIPATHI

Full Stack Developer | React.js | Node.js | .NET Core | JavaScript | REST APIs | SQL

Senior Associate Engineer

tripathi.kr.himanshu@gmail.com | +91-8174991134 | Jaipur

PROFESSIONAL SUMMARY

Software Engineer with 3.5+ years of professional experience across software development, QA automation, API testing, and database-driven applications, with a strong focus on full-stack development. Hands-on experience developing web applications and REST APIs using React.js, Node.js, .NET Core, JavaScript, and SQL. Experienced in building reusable frontend components, implementing backend business logic and CRUD operations, integrating APIs, authentication workflows, and database interactions. Strong foundation in debugging, application performance optimization, Agile development, Git, CI/CD, Selenium automation, API testing, and SQL validation, bringing a quality-focused engineering approach to building reliable and maintainable software.

WORK EXPERIENCE

NAV Fund Services (India) Pvt. Ltd Senior Associate Engineer

October 2024 - Present

- Developed and maintained scalable web application components using React.js, Node.js, .NET Core, JavaScript, and SQL.
- Designed reusable React.js components and supported responsive user interfaces for enterprise applications.
- Built and integrated REST APIs for authentication, reporting, workflow automation, and data processing.
- Implemented backend business logic, CRUD operations, and database interaction modules.
- Integrated frontend applications with backend APIs to support end-to-end business workflows.
- Worked on application debugging and production issue resolution across frontend, backend, and database layers.
- Optimized application workflows and database interactions to improve application performance and reliability.
- Collaborated with cross-functional teams in Agile environments to deliver production-ready features.
- Worked with Git, CI/CD workflows, and version-controlled development and deployment processes.
- Applied QA automation and testing knowledge during development to identify defects early and improve overall software quality.
- Development Environment:** React.js, Node.js, .NET Core, JavaScript, SQL, REST APIs, Git, CI/CD

SEB Administrative Pvt Ltd. Senior Test Engineer

June 2022 - July 2024

- Performed manual and automation testing for enterprise web applications across functional and regression workflows.
- Developed and maintained automated web application test cases using Selenium WebDriver.
- Designed reusable automation components and execution workflows to improve testing efficiency.
- Conducted REST API testing using Postman, validating responses, status codes, business workflows, and backend integrations.
- Validated database records and application workflows using SQL queries and CRUD operations.
- Identified, analyzed, tracked, and reported software defects in collaboration with development and business teams.
- Participated in Agile ceremonies including sprint planning, stand-ups, defect triage, and release activities.
- Validated frontend and backend integration workflows to ensure application consistency.
- Contributed to reusable automation framework components and reporting utilities.
- Used software testing and automation knowledge to improve release stability and software quality.
- Testing Environment:** Selenium WebDriver, JavaScript, Postman, REST APIs, SQL, Automation Frameworks, Agile

Projects

Bug Tracking System

Full Stack Application

Technologies: React.js | Node.js | Express.js | MongoDB | REST APIs

- Developed a full-stack issue tracking platform for managing software defects and issue lifecycle workflows.
- Built reusable frontend components for ticket creation, assignment, priority management, and issue tracking.
- Developed REST APIs for issue management and user activity handling.
- Implemented authentication and role-based access control.
- Developed workflows supporting ticket assignment, priority management, and issue lifecycle tracking.
- Integrated frontend components with backend APIs and database operations.

- Integrated frontend components with backend APIs and database operations.
- Applied modular backend architecture to improve application maintainability.
- Optimised frontend-backend communication for reliable application workflows.

Full Stack Reporting Application

Technologies: React.js | Node.js | SQL | Selenium

- Developed a centralised reporting dashboard for automation execution analytics and reporting.
- Built frontend modules for execution tracking, filtering, reporting, and analytics.
- Integrated automated test execution data to provide centralised reporting visibility.
- Developed backend functionality for processing and retrieving automation execution information.
- Implemented SQL-based data retrieval and reporting workflows.
- Integrated Selenium execution data with the reporting platform.
- Reduced manual monitoring effort through centralised execution analytics.

SKILLS

Programming Languages

- JavaScript (ES6+),
- C#,
- SQL

Frontend Technologies

- React
- HTML5
- CSS3
- Bootstrap

Backend Technologies

- Node.js
- Express.js
- .NET Core
- REST API

Database Technologies

- SQL Server
- MySQL
- MongoDB
- CRUD Operations
- Query Optimization

Development Tools & Platforms

- Git, GitHub
- Visual Studio
- Jira
- Microsoft Azure
- CI/CD

QA & Automation Technologies

- Selenium WebDriver
- Playwright
- Postman, API Testing
- Automation Framework
- Defect Tracking & Regression Testing

Development Concepts & Methodologies

- Agile Methodology, SDLC (Software Development Life Cycle)
- Debugging, Performance Optimization, Authentication & Authorization, API Integration
- Frontend-Backend Architecture, Business Logic

CORE DEVELOPMENT COMPETENCIES

- Experienced in Full-Stack Web Application Development using React.js, Node.js, .NET Core, REST APIs, and SQL.
- Skilled in Frontend-Backend Architecture, API Integration, Business Logic, CRUD Operations, and Database-Driven Application Development.
- Experienced in implementing Authentication, Authorization, Workflow Management, and reusable application components.
- Strong in Application Debugging, Troubleshooting, Performance Optimization, and Production Issue Analysis across frontend, backend, API, and database layers.
- Experienced in Agile Development, Cross-Functional Collaboration, Automation Framework Development, and Software Quality Engineering.

KEY ACHIEVEMENTS

- Developed full-stack web applications and REST APIs using React.js, Node.js, .NET Core, and SQL, covering frontend, backend, and database workflows.
- Built a centralized automation reporting dashboard integrating Selenium execution data, improving test-result visibility and reducing manual monitoring effort.
- Developed reusable automation frameworks and application components, combining software development and QA expertise to improve maintainability, reliability, and release quality.
- Collaborated with cross-functional Agile teams to troubleshoot application issues, integrate APIs and databases, and deliver reliable, maintainable software solutions.

EDUCATION

Bachelor of Technology in Computer Science and Engineering
Dr.A.P.J Abdul Kalam Technical University

August 2014 - July 2018

Primary Technology Stack : React.js | Node.js | .NET Core | JavaScript | REST APIs | SQL

Additional Engineering Strength:

- Selenium Automation | API Testing | SQL Validation | Software Quality Engineering
