

PROFESSIONAL SUMMARY

Full Stack Developer with 1–1.5 years of hands-on experience in developing scalable web applications, REST APIs, and database-driven systems using React.js, Node.js, .NET Core, JavaScript, and SQL, backed by 3 years of professional experience in QA Automation and Software Testing. Skilled in frontend-backend development, API integrations, automation frameworks, Selenium testing, and Agile delivery methodologies. Strong understanding of SDLC, STLC, CI/CD workflows, debugging, performance optimization, and software quality engineering. Combines development expertise with a strong QA mindset to build reliable, high-performance, and business-focused applications.

WORK EXPERIENCE

Senior Associate Technology

NAV Fund Services (India) Pvt. Ltd

- Oct 2024 - Present
- Developed scalable full-stack web applications using React.js, Node.js, .NET Core, JavaScript, and SQL.
 - Built reusable frontend components and optimized application performance for better responsiveness and user experience.
 - Designed and integrated REST APIs for authentication, business workflows, and data processing.
 - Worked on backend logic, CRUD operations, database optimization, and API integrations.
 - Collaborated with QA and business teams to ensure high-quality software releases.
 - Performed debugging, bug fixing, and production issue resolution for enterprise applications.
 - Applied QA knowledge during development to reduce defects and improve software reliability.
 - Followed Agile methodologies, Git workflows, and CI/CD practices during software development lifecycle.

Senior Test Engineer

SEB Administrative Pvt Ltd.

- June 2022 - July 2024
- Performed manual and automation testing for web-based enterprise applications.
 - Designed and executed test cases, test scenarios, and regression suites.
 - Automated web application testing using Selenium WebDriver.
 - Conducted API testing using Postman and validated backend workflows.
 - Identified, tracked, and reported defects using bug management tools.
 - Collaborated with developers and business teams to improve software quality and release stability.
 - Participated in Agile ceremonies including sprint planning, stand-ups, and defect triage meetings.
 - Validated database records using SQL queries and CRUD operations.

QA Projects

Enterprise Web Application Testing

- Technologies: Selenium, SQL, Postman, JavaScript**
- Automated critical regression test cases for web applications.
- Reduced manual testing efforts and improved release confidence.
- Validated frontend and backend integration workflows.

API Automation & Validation

- Technologies: Postman, REST APIs, SQL**
- Tested REST APIs for authentication, CRUD operations, and business logic validation.
- Performed response validation, status code verification, and schema testing.

Automation Reporting Dashboard

- Technologies: Selenium, JavaScript, SQL**
- Developed automation execution reporting workflows.
- Improved defect visibility and reporting efficiency for QA processes.

Projects

Automation Testing Framework

- **Technologies: Selenium, JavaScript, Node.js**
- Developed a reusable automation testing framework for web applications.
- Implemented data-driven testing and reporting mechanisms.
- Reduced repetitive manual testing effort.

Bug Tracking System

- **Technologies: React.js, Express.js, MongoDB**
- Built a full-stack bug tracking application with authentication.
- Added issue assignment, priority tagging, and status tracking.
- Implemented REST APIs for seamless frontend-backend communication.

SKILLS

Frontend Technologies

- React
- JavaScript (ES6+)
- HTML5
- CSS3
- Bootstrap

Backend Technologies

- Node.js
- Express.js
- .NET Core
- REST API
- Microservices

Backend Technologies

- Git, GitHub
- Visual Studio Code
- Visual Studio
- Bitbucket, Jira, Microsoft Azure, CI/CD Basics

Database Technologies

- SQL Server
- MySQL
- MongoDB
- CRUD Operations
- Query Optimization

QA & Automation Technologies

- Selenium WebDriver, Postman, API Testing
- Manual Testing, Functional Testing
- Regression Testing, Smoke Testing
- Automation Framework
- Defect Tracking & Bug Reporting

Development Concepts & Methodologies

- Agile Methodology, SDLC (Software Development Life Cycle), STLC (Software Testing Life Cycle)
- Debugging, Performance Optimization
- Frontend-Backend Architecture

ACHIEVEMENTS

- Leveraged QA automation expertise during development to build more reliable and defect-resistant applications.
- Bridged the gap between development and testing teams by contributing across both software engineering and quality assurance functions.
- Improved release quality and deployment confidence through combined expertise in development, debugging, automation, and testing.
- Built applications with a strong focus on performance, scalability, maintainability, and software quality standards.
- Applied strong analytical and problem-solving skills to optimize both application functionality and testing processes.'
- Developed scalable full-stack web applications using React, Node.js, and .NET Core, improving application performance and usability.
- Designed and integrated secure REST API services for authentication, reporting, and workflow management systems.
- Reduced testing turnaround time by creating reusable automation utilities and structured execution workflows.
- Validated complex business workflows, frontend-backend integration, and database consistency across multiple releases.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

August 2014 - July 2018

Dr.A.P.J Abdul Kalam Technical University

Percentage: 74.4%

12th Kendriya Vidyalaya G.C C.R.PF, Lucknow

2010-2011

Central Board of Secondary Education (C.B.S.E)

10th Kendriya Vidyalaya G.C C.R.PF, Lucknow

2012-2013

Central Board of Secondary Education (C.B.S.E)
